PROFIL SUMMARY

Informatics Engineering undergraduate student with a strong interest in Data Analytics and Business Intelligence. Skilled in SQL, Python, Excel, and data visualization for transforming raw data into actionable insights. Experienced in exploratory data analysis, database querying, and creating data-driven reports through academic and personal projects. Eager to apply analytical thinking and problem-solving skills in real-world business and technology environments.

Primary Language: Indonesia, Secondary: English

EDUCATION

- Mercu Buana University | Jakarta | 2023-Now | *Informatics Engineering* | GPA 3.80/4.00

SKILL, COMPETENCY, AND SOFTWARE

Technical Skills

Data Analysis

- SQL
- Python(Pandas ,Numpy ,Matplotlib ,Seaborn ,dll)
- Data Cleaning
- Data Visualization
- Exploratory Data Analysis (EDA)

Software Development & Database

- Programming Languages Intermediate (Pytohn, HTML, CSS, JavaScript,PHP)
- Web Development (Frontend & Backend Basics)
- Database Design & Querying (MySQL, SQLite)
- Version Control (GitHub)

Soft Skills

Leadership, Critical thinking, Problem Solving, Teamwork, Adaptability, Time Management

Organizations

Member of Student Legislative Council – Advocacy Division

EXPERIENCE

Data Scientist Project Based Internship Program

Rakamin Academy x ID/X Partners | Jun 2026 – Present

- Applied data science methodologies to solve real-world business problems through project-based case studies.
- Performed data preprocessing, cleaning, and exploratory data analysis (EDA) using SQL and Python.
- Utilized statistics, SQL querying, Python programming, and machine learning techniques to support business decision-making.

CERTIFICATION

Certification

- Oracle Academy: Database Design and Programming with SQL- Oracle Academy, 2024
- Data Analysis with Python – IBM, 2025
- Belajar Dasar AI – Dicoding, 2024
- Belajar Dasar Data Science, Dicoding, 2024
- Introduction to Artificial Intelligence - Datacamp, 2024
- Guide to Lean Python - DqLab, 2024
- Guide to Leam SQL AI -DqLab, 2024
- Applied Generative AI & NLP With Python – Packt, 2025

PROJECT EXPERIENCE (ACADEMIC & PERSONAL PROJECTS)

- **Heart Disease Risk Prediction** Developed a machine learning model to predict heart disease risk using health indicators such as age, cholesterol, blood pressure, and lifestyle factors. Performed data preprocessing, feature selection, and model evaluation to improve prediction performance.
- **Customer Churn Prediction** Created a machine learning model to identify customers likely to stop using a service. Analyzed customer behavior, subscription history, and service usage data to support business decisions and retention strategies.
- **Product Review Sentiment Analysis** Developed a sentiment analysis model to classify customer reviews into positive, neutral, and negative categories. Applied Natural Language Processing (NLP) techniques and machine learning algorithms to analyze customer opinions and generate business insights for product evaluation.
- **Interactive Chatbot for Campus Organization Member Selection** Designed and developed an interactive chatbot for simulating campus organization recruitment. Implemented Adaptive Questioning and Natural Language Processing (NLP) to automatically evaluate responses and provide objective assessment results.
